

	QUALITY, ENVIRONMENT AND SAFETY POLICY	ALL00_01
		Rev. 0 – 10/16
		Pag. 1 di 1

CONVETT Srl, founded in 1981, carries out, as main activity, the realization of radiators for the cooling of transformers, of corrugated walls for the construction of tanks for transformers and of the tanks too, products that are sold both in Italy and abroad .

CONVETT S.r.l. pursues the highest standards of quality and customer care offering its products and recognizes that the constant respect of the commitments undertaken with its customers and exceeding their expectations are a permanent obligation for all the company staff.

CONVETT S.r.l. undertakes to adopt common quality standards for the realization of its products and for the measurement of customer satisfaction, which it intends to provide transparent information.

The company takes as priority the quality of life of the employees, respect for the environment and the care of relationships with suppliers through constant action to enhance, motivate and train human resources.

To this end, the Management, taking into consideration the organization's context, the company size and its typology and the possible impacts of its activities and products, undertakes:

- to provide adequate human, economic and instrumental resources to guarantee the correct, sure and effective implementation of its Quality, Environment and Safety Management System;
- to apply the provisions of the binding legislation in terms of quality, protection of the environment and health and safety of workers;
- the constant training of its workers;
- to spread among the staff the maximum sensitivity towards environmental issues, safety in the workplace and quality of service, involving them in the knowledge of the issues themselves and ensuring their involvement for the full sharing of the company's policy and objectives;
- promote the rational and efficient use of energy resources and raw materials;
- reduce, where possible, the impact of its activities on its workers and on the environment, preventing injuries, illnesses and accidents;
- to evaluate and periodically check the effects of its current and present activities by means of adequate procedures and/or registration documents;
- to ensure that the integrity of the Integrated Management System is preserved when changes to the system are planned and implemented;
- to manage its Integrated Management System with a view to continuously improving its Quality, Environmental and Safety performance, periodically identifying objectives aimed at this.
